

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	Ms_AJEA_25167
Title of the Manuscript:	Feed Intake, Weight Gain and Carcass Characteristics of West African Dwarf Sheep fed Moringa oleifera, Gliricidia sepium or Cassava Fodder as Supplements to Panicum maximum
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
We agree with the changes and justifications of the authors. Sorry in suggestion "Moreover there are is serious calculation error in TABLE 2 for the values of intake of CP and CF" read "Moreover there are is serious calculation error in TABLE 3 for the values of intake of CP and CF". Note, eg treatment 1 - F, which dry matter intake (g day ⁻¹) = 535.7, thus, 535.7 x 12.17 (PB% - Table 1) = 65.19 and not 97.34 review all treatments. After correction review all discussion intake of crude protein and fiber. The intake values NFE, EE and Ash are correct, Eg treatment 1 - F, which NFE intake (g day ⁻¹) = 535.7, thus, 535.7 x 34.47 (Nitrogen Free % - Table 1) = 184.66.
