

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	Ms_AJEA_29310
Title of the Manuscript:	Factors Affecting Rice Production in Awka North Local Government, Anambra State, Nigeria
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
A table should be given on the quantity of inputs used like amount of seeds, fertilizers, labour hours, tractor hours etc used for rice production apart from giving only the frequencies. This also should be given across farm sizes to understand the dynamics. The amount of inputs used across farm sizes will reflect on the rice production in the study region. It also gives a clue whether farm size is a major factor in deciding the productivity of rice.	No research is exhaustive. We did not collect data on these because they were not the concern of the study. Note that the topic and objectives have been changed to reflect the content of the paper. Dynamics and productivity are no longer part of the study. See lines 61 to 64 of the manuscript for verification,
