

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_30778
Title of the Manuscript:	Physico-Chemical Properties and Resistance of Ten Bambara groundnut (<i>Vigna subterranean</i>) Varieties to Attack by <i>Callosobruchus maculatus</i> (Fabricius) (Coleoptera: Chrysomelidae) in the Sudano-sahelian and Sudano-guinean Zones of Cameroon
Type of Article:	Original Research paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Many sections have been attended as instructed, however there are still some sections which are not yet attended. Eg Line 106 in the original manuscript is not corrected: each variety ~~have been~~ were individually According to author's response, "Sorry, Kodek was used during rearing of the bruchids for experiment with cowpea (another manuscript) and cowpea was used for experiment with Bambara groundnut", I think you need to correct it in the manuscript, section 2.2 Insect rearing. Refer the following statement which is in the revised manuscript; At each site of study 250 g of Bambara groundnut (Kodek) and then 30 <i>C. maculatus</i> adults were introduced in glass jars (900 ml) for the insect rearing. So what did you use for this experiment? Kodek or cowpea? Please refer my previous comment	"Each variety have been individually" is corrected to "each variety were individually" (currently in line 108) For this paper, cowpea (Vya Moutourwa variety) was used. The mistake is corrected in section 2.2 Insect rearing
