SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, corrects the manuscript and highlights that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	There are a few spelling, grammatical, sentence structure errors that should be corrected prior to publication. The author may find the use of a proofreading service to be helpful. Cambridge proofreading does a great job editing for a very reasonable price (proofreading.org) Make sure that you include proper citations throughout the manuscript. For example, this sentence needs a citation: Supplementing concentrates to low-quality roughages is known to improve intake and digestibility of roughages.	We have corrected spelling, grammatical and sentence structure errors. We ensure the proper citations throughout the manuscript and add citation for your coated sentence. It also highlighted in the manuscript.
<u>Minor</u> REVISION comments	Diet feeding times are listed as 8:30 in one paragraph and 8 in the other. Make the times consistent. Also adaptation time is written as 10 days and 14 days. Which is correct? In multiple sections (2.6, 3.1, etc.) the author says that goats were used not sheep. Clarify which species were used or if two different trials were conducted one with goats and one with sheep. What breed were the sheep? Were they wethers or rams?	The correct time was 8 AM for diet feeding and 14 days for adaptation period. We have used native growing ram for this trial. We are sorry for this mistake. However, we have corrected them and highlighted in the manuscript.
<u>Optional/General</u> comments
