

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_32129
Title of the Manuscript:	Effects of rootstock type and scion cultivar on grafting success and growth of mango (Mangifera indica) seedlings.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The results reported in this study have relevant information about mango propagation and scion-rootstock interaction. Furthermore it contains important findings for regional agriculture of Tanzania. The manuscript is acceptable for publication after minor revision. The suggestions and comments were done in the manuscript. Best Regards. The comments and suggestions were done in the manuscript.	Abstract conclusion: Comment accepted and sentence changed Line 98: Accepted and added Line 143: Accepted and deleted Line 154: Accepted and added Line 155: Accepted and changed Line 164: Accepted and explained Line 165: Accepted and explained Answers for some comments above would have been possible if we had measured biomass. In this study instead of destroying the seedlings to measure biomass we transplanted them in the field arranged in the same design for long term (10 years) observations on canopy size, fruit yield and quality.
<u>Minor</u> REVISION comments	The comments and suggestions were done in the manuscript.	
<u>Optional/General</u> comments		Thanks for good comments
