

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_33807
Title of the Manuscript:	EVALUATION AND AGRONOMIC POTENTIAL OF ANDROGENIC PEPPER GENOTYPES DERIVED FROM PIRAN (Capsicum annuum L. cv. Piran)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack o f No v elty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The paper presents interest due to the studied biological material. The obtaining of androgenetic lines is a newer method in plant breeding. Creating such lines can lead to new varieties in a shorter period of time. The work has a more practical applicability. The way the work is done gives it the scientific value. The experimental data are statistically processed appropriately and are discussed compared to the results of other researchers. Are discussed compared to the results of other researchers.	Thank you for your comments. We acknowledge your support of our research work and results presented and discussed in this manuscript.
<u>Minor</u> REVISION comments	For a better highlighting of androgenic line value compared to the Piran variety, it would be useful to present images with its fruits.	Accepted and corrected. Pictures of variety Piran are added in the manuscript.
<u>Optional/General</u> comments
