PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The paper has contributive results also new findings for the species. However a few general papers should be also used in INTRODUCTION. So, a few new papers were suggested in the enclosed paper. They should be cited in new version of the paper. Beside, purpose/s of the study should be also given at the end of INTRODUCTION by a few sentences.	1. The purpose of the study has been included at the end of the Introduction paragraph. 2. I have included two general papers; however, of the recommended papers I was only able to find one article. I couldn't find the 2017 article hence the failure to include it in the article.
Optional/General comments
