PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	I congratulate the authors for their work. The action of garlic on increasing palatability attested in literature. The findings are interesting because it demonstrates a decrease in cholesterol. However, eggs are an important source of immunoglobulins as the IgY. I suggest that in future work the authors explore the action of garlic in the production of antibodies.	This observation is well noted. Thank you.
