SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	This work is very good, since the use of ancestral plants like this, for the obtaining of natural medicines of high therapeutic efficiency. In this sense, the chemical characterization of the secondary metabolites through a novel technique allows to determine which group of compounds exerts greater bactericidal effect in certain microbial strains. Therefore, this research may be the basis for future work on the isolation and testing of these metabolites in different diseases. In addition to corrections of form in the text.	
Optional/General comments
