SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Title should be change as DIVERSITY of Ralstonia solanacerum SPECIES STRAINS IN SOLANACEOUS CROPS PRODUCTION REGIONS OF CENTRAL KENYA (replace term species with strains) There is controversial statement in the conclusion section in the Abstract. The pathogenic factor that mention in the sentence is not clear. Actually Conclusion is not reflect objective of the study. There is no clear cut objective/s indicate in the main text. Author should clearly indicate the area that collect samples are regions or counties. I feel term use as countries is not appropriate. There is no clear cut methodology to explain how they confirm Pathogenicity. Some discussion parts are not relevant to the particular findings of the study (ex: page 4 ,1st paragraph) Dendogram is not clear. Please include high quality diagram with clear labelling	
Minor REVISION comments	All scientific names should italic.	
Optional/General comments	The study is regionally important. There are some grammatical and typesetting errors
