SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	- Minor mistakes in the use of English language (grammar and expressions). - P-value testing is employed towards the determination of statistical significance; it would be nice to include the output of the statistical program used in the manuscript, demonstrating the result of the p-value calculation to the reader.	
<u>Optional/General</u> comments	- Maybe a more up-to-date reference regarding HbAA and HbBB, since the one used is from 1956 – if available that is. - Since the initial hypothesis was not statistically proved correct, maybe by employing other statistical theories, statistical significance could be achieved. Food for thought for future studies.
