PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1-The paper simply describes when to sow the two Rice species to get the best yield, which was interpreted with phenotypical parameters. There are similar papers describe same situation (might be with some other rice genotypes) in Bangladesh. However, the paper doesn't provide any comparison, Why? Also, the title is not correct because the study is only dealing with rice production in Bangladesh. 2-Line 116 is blurry, Line 122 must be checked for typing error. There are some more typing and font errors. 3-In intro, at least one sentence in final paragraph can be used to reveal the important findings 4- In Figures, some explanations are required such as ab, AC etc. not everyone is expert to understand everything	
Minor REVISION comments		
Optional/General comments
