SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	General Comments: - There are many typographical and grammatical errors which need to be rectified. Specific Comments: - The title of the paper has to be reframed as quoted in the text. - The abstract is very elaborative. So concise it within the word limits as specified in journal guidelines mentioning only the major salient findings. - Rewrite the keywords and arrange them in alphabetic order. - Weather data need to be included in 'materials and methods' section. - Express the treatment no (e.g. T1) in subscript format (T_1). - Make a common subheading in result section "growth and production parameters of soybean" under which describe each parameter instead of writing "soybean" in each heading. Similar way of representation should also be followed for maize. - Add the missing abbreviations as footnote below corresponding table. - Discussion section needs refinement. - Carry out necessary corrections as highlighted in the text. Suggestions to Author: - Recast the manuscript write-up making it more crisp and concise.	
Minor REVISION comments		
Optional/General comments
