| <b>Compulsory</b> REVISION comments | <ol style="list-style-type: none"> <li>1. Authors should double check their experimental design. The experiment is under control environment. The authors used randomised complete block design. The big question is what are they blocking in greenhouse experiment (control environment)? I would suggest they should use completely randomised design</li> <li>2. Authors wrote in the Abstract section that main treatment is 3 (production materials) and sub treatment is 3 (Fruit varieties) replicated 4 times and sum up total treatments as 36 instead of 24. How did you arrive to this number?</li> <li>3. There is a mix-up: The Vase, Slab and Ceramic Block cultivation systems did not influence the production and quality of strawberry fruits. The Ceramic Block system provided the lowest performance of strawberry in relation to the Vase and Slab systems. Please, clarify these statements?</li> <li>4. Authors should support their findings with more recent publications.</li> <li>5. A native English speaker should assist the authors to proofread this paper.</li> </ol> |                                                                                                                                                                               |
| <b>Minor</b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                               |
| <b>Optional/General</b> comments    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                               |
