

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2014_AJEA_10320
Title of the Manuscript:	Seasonal and Genotypic Influence on Insect Pests, Growth and Yield of Cowpea (<i>Vigna unguiculata</i> L. Walp)

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The revised paper came with some modification. Some refused considerations were justified, but many of the comments were neglected, e.g.: The scientific name of cowpea remains misspelled; <i>Ootheca</i> (line 240) remains without italics; Introduction: the authors just copied and pasted a reviewer comment as follows: "... Cowpea is not widely cultivated in any rainy condition. <u>It is not necessary to tell the total cultivated area.</u> Inspite of the importance of cowpea as a protein rich food, it is still more cultivated on drier regions. Quin (1997) noted..." Discussion remains almost the same as previous version. Inclusion of some references related to the bioecology of the insects could provide a more robust discussion. These minor modifications and other comments (.pdf previously sent) could have been taken into consideration.	Please the scientific name of cowpea I know remains <i>Vigna unguiculata</i> Corrected Corrected Addressed
