PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Line 55: Why did you add distilled water to the fruit juice for the TA measurement? 1 ml fruit juice is very less. Mandarin is a juicy fruit and you could obtain the juice very easily. Why did you take 1 ml fruit juice? There are many grammar mistakes throughout the manuscript and should be corrected.	Water was added for TA analysis because it was follow extraction protocols and they are with water. According to the Manual of Methods of Analysis established by the Ministry of Livestock Agriculture and Supply of Brazil and also many others publications, the protocol should be followed as it was carried out. In fact 10 mL of juice was added instead of 1 mL, it was a mistake in typing. We are sorry for this. These grammar mistakes were observed throughout the manuscript, and it was corrected.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
