**PART 1: Review Comments**

|                                     | Reviewer's comment                                                                                                                                                                                                                                                                                                                                                                                                                               | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Compulsory</b> REVISION comments | <ul style="list-style-type: none"> <li>- remove the dot on latin name on the abstract</li> <li>- key word: change pesticides with dry season and rainy season</li> <li>- move to the next sentence abbreviation Latin name on result <b>Proportion of zucchini flies</b></li> <li>- <b>move to the next page Impact of the flies on the production</b></li> <li>- replace table 3 with table 1 except before there are tables 1 and 2</li> </ul> | <b>all your remarks have been taken into account you will see them in the text</b>                                                                                            |
| <b>Minor</b> REVISION comments      | add a figure of the four identified fly species found in plants                                                                                                                                                                                                                                                                                                                                                                                  | <b>all your remarks have been taken into account you will see them in the text</b>                                                                                            |
| <b>Optional/General</b> comments    | great article. but the discussion of pesticides must have a linking paragraph with the fly attack. why the pesticide used does not affect the fly population?                                                                                                                                                                                                                                                                                    | <b>all your remarks have been taken into account you will see them in the text</b>                                                                                            |
