

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_40114
Title of the Manuscript:	Variation of soluble sugar and minerals contents of kernels from Germinated Nuts of Several Coconut Cultivars (<i>Cocos nucifera</i> L.)
Type of Article:	Original research papers

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The manuscript is not revised properly. I already mentioned in the first review process the sampling is not clear. But authors not given proper reason for sampling. Because of that I am not able to conclude anything. For example in the manuscript it is mentioned that the sucrose content in WAT is 65.14% to 76.02%, but the value in table is entirely different. Mostly all the values mentioned in the manuscript and in the table are not matching. It looks authors are not serious about presenting data in proper scientific way.	I apologize for the data errors in the table. but I would like you tell me concretely what you do not understand in the sampling because in my opinion I think it is clearly described. thanks for your understanding.
