

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_40984
Title of the Manuscript:	Phenotypic plasticity of sugarcane genotypes under aluminum stress
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript describes research conducted following standard scientific methods and presented in an acceptable manner for publication. The authors should mention how the Al toxicity was imposed in the particular treatments (Al high concentration) in the materials and methods section.	<i>Dear reviewer, thank you very much for your considerations. The tropical soil is, in general, with low pH and high Al saturation. We used an acid soil with 53% Al saturation (did not need correction) and to represent the low saturation, we correct the soil for Al saturation, obtaining 0% Al saturation. We changed the sentence in the text to better understand.</i>
<u>Minor</u> REVISION comments	The minor language mistakes should be corrected.	<i>The language translation was done by American Journal Experts. We reviewed and corrected the language mistakes found.</i>
<u>Optional/General</u> comments	None
