

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_41211
Title of the Manuscript:	SPACIAL VARIABILITY OF KENWORTHY BALANCED INDEXES (KBI) FOR MACRO AND MICRONUTRIENTS ON THE COFFEE CANEPHORA
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
This manuscript is now in form and content. Otherwise there are some minor corrections as indicated (in the revised manuscript) to be incorporated in the final manuscript to be published.	Sentence 1 - The meaning of the phrase is IBK not only determined for macro or micronutrients, but for all the nutrients evaluated in the analysis. Sentence 2 - About the request for quotation in the introduction - When I talk about the importance of agriculture and coffee cultivation I am talking about widespread knowledge. Everyone who watches newspapers on TV or read some kind of newspaper knows that agriculture saved GDP in the first quarter in Brazil. I did not take the information from other authors, I gathered information already disseminated to highlight the importance of having a study involving coffee cultivation. If you still feel that I should insert references I will place values on the participation of agriculture and I cite the source, but as a researcher, I do not see any need for this in the current context. The same goes for precision agriculture. Sentence 3 - About fertilization recommendation: The recommendation is made annually in these months. That is, every year in August and September the recommendations are made. Sentence 4 - About the citation - I made the corrections in the citations.
