PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is a very detailed scientific work. Unless the journal requires otherwise, a section on "conclusion" would be meaningful. If you mean to have fused it within discussion, then the title should be "discussion and conclusion". Another concern is on the textural description. You may have used your own local triangle (Brazilian?), but remember this is an international paper and therefore international expressions should prevail.	Inserted
Minor REVISION comments	N/A	
Optional/General comments	N/A
