PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	- This article is very good, but main problem and observable variables un clear - What is the main contribution the result of this study to the problem ? - Sould be clear why this study "done"	Changes made! What was changed in the work is highlighted with the color "yellow".
Minor REVISION comments	- Will be better if you able to identify the difERENCE one species to other species by statistical inferetial analysis - Fact finding need to discussed more by inferential statistical analysis to make it more powerful	This case study intends to compose a discursive approach in a legal reserve area of a tropical rainforest, inserted in a landscape often associated with anthropic disturbances. Because the present study is a case study, it is not possible to reduce the reference analyzes to characterize the differences between species.
Optional/General comments	Discussion need to be elaborated more	Changes made! What was changed in the work is highlighted with the color "yellow".
