

Editor's comment :

I had gone through the submission details and the revision of the manuscript you had sent for my editorial decision. As you could see from the annotated manuscript the manuscript needs a substantial revision to make the presentation more acceptable. I am attaching herewith my comments and annotated manuscript of the same for further action.

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_42422
Title of the Manuscript:	Production characteristics of watermelon, under different coverings and irrigation with deficit, using the ISAREG model

Dear Authors,

The revision submitted has taken into consideration all the suggestions raised by the reviewers. But when I had gone through the revision submitted I found that the manuscript needs a substantial revision in presentation as many parts are loaded with long sentences that run into several lines and wrong usage of words throughout the manuscript. I had corrected many of them and there are still more. The author(s) should modify the presentation making it easier to read by seeking the help of a colleague with good proficiency in English or a native English speaker. Further, abbreviations have to be explained at the first instance. Modify the title of the study on the suggested line. Please indicate the changes and modifications in your revision by highlighting or using different font colour.

Author's feedback :

We indicated changes and modifications with yellow highlighting.

Title changed as suggested.
