

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_42505
Title of the Manuscript:	Efficiency of nitrogen utilization by corn cultivars for the production of green ears
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	No comment on the N-use activity with a single dose can not be given. In such a study, at least 4 or 5 doses of nitrogen should be investigated. Then the information becomes trustworthy.	The reviewer is right for the reduced number of treatments (cultivars and doses). However, it is a preliminary research to study the efficiency of N utilization with maize cultivars with potential for green grains. The research will be applied, where other maize cultivars will be evaluated. The results obtained are important because it will allow the producers, for the cultivars studied, to use different doses of N as a function of their efficiency
Minor REVISION comments		
Optional/General comments
