| <b>Compulsory</b> REVISION comments | <p><b>1. The authors are advised to check for gross English language, especially for English grammar, and to avoid using long sentences. Some examples are cited below:</b><br/>change "This work aims identify" to "This work aims to identify";<br/>change "Was evaluated the performance of six genotypes of the safflower..." to "The performance of six genotypes of the safflower was evaluated..."<br/>Please correct similar mistakes.</p> <p><b>2. Discussion is suggested to be better described, telling readers why these parameters were measured, and which were good ones for breeding selection.</b></p> <p><b>3. Conclusion may should tell us which genotypes of <i>Carthamus tinctorius</i> L., adapted relatively better in the Pernambuco State Forest Middle Zone after the experiment.</b></p> | <p>The suggestions were inserted in the paper.</p> <p>Thank you very much for your contributions!</p>                                                                         |
| <b>Minor</b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                               |
| <b>Optional/General</b> comments    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                               |
