

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms JEAI_43086
Title of the Manuscript:	EVALUATION OF CULTURING METHODS FOR <i>Scutellonema bradys</i> IN YAMS
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The author has accepted most of the changes suggested and made the necessary adjustments. I found a few small errors in the revised manuscript (spacing mostly, and there may be more). In the References there are still inconsistencies: in 17 and 19 every word starts with a capital letter, including bradys, but that is not the case with 28.	The reference had already been corrected and is accepted by the authors The issue with spacing, i think is a ms word formatting problem. It does not appear so in my original document. Comment s1: I think the sentence reads better without the word 'using' it serves the same purpose as '....methods evaluated were.....' 'Were' and 'using' together is tautology The p=.05 is as specified by the instructions to authors of the journal. I have left the correction in however, with the expectation that the format editor will use what the journal prefers. Coment 2: correction in the figure have been made
