

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_43767
Title of the Manuscript:	APPLICATION OF SILICON TO ALLEVIATE IRRIGATION WATER SALINITY IN MELON GROWTH
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Include reference for salinity effect with Si in introduction part, some corrections in materials and methods (as per given in the manuscript)	Thank you for the suggestions made in the text. But in relation to the introduction, we entered into consensus and observed that in the course of the results and discussions there is already a large number of articles citing the success of silicon in their research, so we chose not to add more work in the introduction, mainly because they are different cultures and conditions to those found in our work, being more important to present the benefits that the nutrient can bring to the plants.
Minor REVISION comments	Figure alignment and reference style	
Optional/General comments	Paper can be accepted after corrections	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
