PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Compulsory revision should be carried out particularly on; - To achieve objective number 3, attitudinal (Likert) scale should be used to measure the perception of respondents. Whether 3, 5 or 7 points Likert scale was used. This information should be reflected in the methodology. - The model of chi square used should be specified. In my own view, Pearson Product Moment Correlation (PPMC) should be used to determine

	relationship and not chi square, because, PPMC is more rigorous than chi square. This is also because, PPMC measures the extent and nature of relationship. - Results should also be presented in tabular form, besides the graphical illustrations.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Keywords should be provided for the purpose indexing	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
