PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The author folloved previous suggestion, while in new version of manuscript I've new remarks. The author made changes and improvement. Introduction is so long and some part (paragraphs) could be use for discussion, particularly because authors did not quoted results of investigation other authors in chapter of discussion. On this base reconstruction of manuscript will be balanced in content of chapter of paper. I've suggest improvement and reconstruction of paper if it is acceptable for authors and Editor! I've also little bit indicated aim of investigation on the end of introduction! One reference in text (BARBIERI, 2009) did not precisely quoted (because two author shoud quote (BARBIERI and STUMPF, 2009) One of references MALAVOLTA, 2006 in text, missed in chapter of references! Also, authors made conclusion!
