

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_38368
Title of the Manuscript:	Sensitivity of different Chenopodium album L. biotypes to metamitron
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The Abstract among others, should contains significant data, and point out major findings. In this case, mentioned things missed The Introduction is quite long. It should provide a clear statement of the problem and the relevant literature on the subject. I think that some references are necessary to corroborate some findings. Experimental procedure (Methodology) is detail explained and clearly understandable. Results are presented with clarity and precision. Discussion is combined with previous section (Results). However, discussion poor interprets the findings in view of the results obtained in this and in past studies on this topic.	
Minor REVISION comments	References listed at the end of the paper are in accordance with "Guide to Authors". But, I think that 14 references are not enough for this subject of investigation.	
Optional/General comments	I can recommend the paper for publication in Journal of Experimental Agriculture International after revision of mentioned remarks.
