

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_39204
Title of the Manuscript:	Chilling requirement of ten peach cultivars estimated by different models
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The work is of interest, well written, simple, and provides very relevant information about the behaviour of low chilling peach varieties during a prolonged period of 11 years. In addition, it relates the fruit tree production data with chilling accumulation, allowing to obtain the minimum chilling accumulation necessary for each variety to reach a good fruit production. The results also confirm that the methods to estimate the chilling requirement of a peach variety and its possible adaptation to an agroecological area are not reliable, and that the vegetative and reproductive evaluation of the varieties is necessary.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
