

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_41521
Title of the Manuscript:	Spatial correlation between eucalyptus DBH and particle size fractions of a Oxisol
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Good work.	
Minor REVISION comments	1- Lines 150-152: "In order to estimate the DAP by cokrigagem, was used as the secondary variable (covariable) the scores determined by the principal component one (PC1) using the original variable clay (CLA) and total sand (ST) in the layers 0 – 0.20 m and 0.20 – 0.40 m depth." – The meaning is not understood. 2- Lines 213-214: "The particle size fractions CLA in the second layer (0.20 – 0.40 m) and TS in the first layer (0 – 0.20 m) with the higher concentrations." - The meaning is not understood. 3- Table 2, lines 245-249: What is "DAP"? Is it supposed to be DBH? 4- Figure 2 is preferred to be placed after line 253, page 9, not after page 10.	
Optional/General comments	Revision for language and grammar. There are few not-english wards. (Figure 1, Table 2, Figure 3)
