

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_41852
Title of the Manuscript:	Effect of Pre-harvest Application of Paclobutrazol and Ethephon on Physico-chemical Characteristics of Winter Guava cv. Sardar
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The experiment was well planned and drafted with good English. All the references were according to journal format.	
Minor REVISION comments	The manuscript would have been complete if the authors have included economics of the treatments. Application of Paclobutrazol may help in early onset of fruits but there were reports that continuous (using it every year for a span of 5-8 years) might make the orchard unproductive or decreased yields were reported in other crops like mango. Authors may continue their work in this regard. Also, authors may conduct studies on storage life, it is of utmost important in the treatments selected by them. Because the application of ethephon triggers the autocatalytic activity of ethylene.	
Optional/General comments	I recommend the article for publication.
