

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_42199
Title of the Manuscript:	Dispersion Syndrome, Ecological Sucession and Structure of the Arbor Component in an Atlantic Forest Fragment, Pernambuco
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	From the general point of view, the paper: "Dispersion Syndrome, Ecological Sucession and Structure of the Arbor Component in an Atlantic Forest Fragment, Pernambuco" does not bring any new information. On the other hand, the results might be useful source of information for show the effects of habitat fragmentation on forest biodiversity in similar environments. The manuscript is well structured with its objectives were achieved. The results, discussion and conclusions are well presented and consistent with materials and methods. The introduction should bring the arguments that justify why the authors decided to study the area. The Introduction is an argument and not a place to talk at length about each variable. Therefore final decision depends on the opinion of editorial board of the journal. In the case of publication, I suggest these small changes found in the introduction the manuscript text.	
Optional/General comments
