PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Abstract - Expression of result is not completed. - It is weak in conclusion Introduction - The rational of research is weak; why three maize cultivar is tested and two levels of N is used. Materials and Methods - Line 91, the method of N analysis is necessary to describe. - Line 96 to 100, references are needed for each equation. Results and discussion - Line 121, height plants should be plant height. - Table 1 is confusable in ABC values. It should be changed to the simple without losing the original meaning. - In Table 2, Dose de N is not English writing. - In Table 3 and 4, there is no upper case in each line. They should be changed to the simple without losing the original meaning. Conclusion - Conclusion seem to be not perfect. References - References are not written in English. This is the format of journal?	
Minor REVISION comments	Nil	
Optional/General comments	Nil	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
