SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This manuscript reports on farmers' response to questions on pineapple production. The information provided is valuable to improve productivity in the studied area and beyond. However, the fact that the questionnaire were left for illiterate farmers with no formal education or/and only primary education to answer makes the response less reliable. If there was assistance, it should be indicated in M&M part. The results in the table and the narratives are sometimes not in agreement. To mention few. Males dominate pineapple production does not go with 28 female and 32 male in the table. Majority of the farmers are old is also misleading as the data in the table shows that majority are below 50yrs. The weighted mean in the result and discussion is not indicated in the M&M and also not presented in Table 3.	
Minor REVISION comments	The word "problem" in the title should be replaced with "Problems" Table 2 Replace "sore" with "Sole" Manual weeding is the same as hand picking. Delete "Hand picking" There are a lot of such mistakes which I couldn't highlight in the documens as it was a PDF file.	
Optional/General comments
