FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
6 and 4 rabbits per treatment (half males and half females) is a small number for the evaluation of performance and carcass parameters. Please check numbering of References (especially at the end of the manuscript – reference list) L10: "population" instead of "populance" L12: Please delete "per adult" after "the value of 35g" (repetition) L14: "cover" instead of "covers" L18: "The rabbit has excellent properties; high growth rate,..." Please delete "that include" (repetition) L37: "including" instead of "involving" L42: "...in all continents apart from Europe..." L79-80: Please delete "of B. arundinaceae and T. procumbens respectively" (repetition) L82: "...ingredients..." L87: Please delete "good" L90-94: Are the results of these analyses shown in the present study? If not, please delete this part. L109: "...fed with the experimental..." L114-115: "... (total and average weight gain)..." L115: "...could be effectively combined with..." L118: "leaves" instead of "levels" L118: "controls" instead of "control diet" L123-124: The structure of this sentence is not correct. Please rephrase. L126-127: This statement is not completely correct. Superscripts are not different between controls and experimental groups in all cases. Please be specific. Table 4: Please change the structure – orientation of this Table. Treatments should be presented in the first row and the examined parameters in the first column (as in the following Tables). L169-191: I have already pointed out that this part should be removed before L109. L169-199: Please check comments of the previous revision. The necessary corrections were not made.
