

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_45354
Title of the Manuscript:	Biomechanical Evaluation of Urban Pruning Activities
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	With the video, the moment of work is recorded, with the position and angle of work. This biomechanical analysis is more secure and the results are not in doubt with the OWAS method. The trawl activity, classified as type 3, requires action and this becomes easier knowing where to act, investing energy and resources at the crucial point. The joints of the knee and ankle presented what was already expected, since the manual work requires this type of movement. In the pruning activity with ladder was observed the occurrence of greater compression in the spine than in the pruning activity without ladder, is there another tool option?	
Minor REVISION comments	The research appears to be a good structure for collecting information and analyzing results.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
