SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The subject is well selected but the experimental study ad conclusion parts are too short and far away from topic. Statistical analysis of questionnaire must be commented, and results must be evaluated. What is the main contribution of this work to the research field? This wasn't explained in detail.	Corrections have been made but it is good to note that the study did not adopt experimental study and the contribution of this work to Nigerian environment has been stressed
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This work may be improved. Subject is appropriate but case study must be enlarged upon research area.	The study did not adopt case study, regression analysis was applied to test the hypothesis, the subject matter indeed has been enlarged in the literature.
