| <b><u>Compulsory</u></b> REVISION comments | <p>I suggest to change the structure of the paper beginning from introduction, theoretical background, then methodology of research, results of the study, and finally conclusions.</p> <p>The problem of the paper (which is innovation potential evaluation) and its main aim (presentation of the cognitive model) should be emphasized both in the abstract and in the introduction.</p> <p>In the methodology the structure of the selected enterprises, belonging to different industries and their size: small, medium or large, should be added.</p> | <p>Agree</p> <p>Agree, (added on pages 1, 2)</p> <p>Agree, the structure of the selected enterprises, was added (page 4-5)</p>                                                              |
| <b><u>Minor</u></b> REVISION comments      | <p>In line 234 the abbreviation of UAH requires to be explained.</p> <p>In the theoretical section it is not easy to underline that innovation process (knowledge creation, commercialization and diffusion) depends on intangibles, particularly possessed and acquired information resources. Their efficiency and availability is determined by factors such as the ability to cooperate in the networks.</p>                                                                                                                                             | <p>Agree, national currency will be converted to EUR</p> <p>Agree, (added on pages 3, 4, 6)</p>                                                                                             |
| <b><u>Optional/General</u></b> comments    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                             |
