[SDI Review Form 1.6](#)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Introduction and the background of the study can be combined. But, it will become too long for introduction. You are not writing a thesis; should shorten the introduction section (after combining it with background). Try to simplify the points that you have in Section 1.2; not to have sub-headings I, II..... 2. Unclear problem statement. It is there but need to be concise and firm. 3. Many typos. 4. The results are not well explained. They are not in line with the explanation provided in the abstract might be due to the inconsistencies in the use of variable names. 5. Wrong way of citations in text. 6. Literature review on MOSES (if any) need to be provide. If it is not available, should mention its limitation. 7. The methodology section must explain about MOSES. 8. The way references were listed was also unstandardized.	
Minor REVISION comments	Should increase more literature review.	
Optional/General comments	I think most of the diagram could be omitted. It can be just enough to explain in sentences.
