PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		Many thanks for this review
<u>Minor</u> REVISION comments	Its a very good article but should be minimize. It is too lengthy starting from introduction down to Empirical, conceptual and theoretical reviews.	We have tried to minimize some sections according to your comments. We are also very sorry that the length is still much. This is because some other reviewers suggested additions, discussions and certain explanations of variables, figures and tables. We tried our best to marry all the comments by independent, anonymous reviewers. Once again, accept our gratitude.
<u>Optional/General</u> comments
