SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Interesting topic but need to be clearer on the types of Mobile Payment and Services using NFC and please cite latest journals relevant to this topic. NFC technology has already been used in Japan, South Korea and other Asian countries successfully (Ondrus & Pigneur, 2007). What types of NFC technology quoted in 2007? Please quote ... Check out the book chapter with the comparison of NFC for mobile payment in the Convergence of technology in the E-commerce world and Venture Capital Landscape in South East Asia. https://www.researchgate.net/project/Global-Entrepreneurship-and-New-Venture-Creation-in-the-Sharing-Economy/update/5a63529f4cde266d5884d17b You can find more NFC mobile payment technologies in this journal: Design and Security impact on consumers' intention to use single platform E-payment. (Just Google) Please state clearly types of Mobile Payment with NFC used in Hong Kong. Please quote relevant latest citation references in these areas. Title: Consumer Acceptance of Mobile Payment Services. What types of Mobile Payment Services consumers in HK are accepting? Please provide types of mobile payments including NFC types of payments as well as mobile payment services in HK in or after paragraph 2 introduction after line 44 page 0.	Thanks for your comment. The NFC technology is clarified in the manuscript. The manuscript is updated with citation of this book chapter. The manuscript is updated with citation of this book chapter. The mobile payment with NFC used in Hong Kong is clarified in line 44. Actually the intention of this research is on the acceptance of using mobile payment no matter what specific type is it, so that's why this research did not specify any type of m-payment, such as Alipay, Wechat pay, Android pay or Apple pay, but to study mobile payment in general.
Minor REVISION comments	TAM model Figure 1 not necessary – well known. Figure 2 – Research model (removed for this)	The authors think that it is still better to keep it for someone who are not expert in TAM but are interested in knowing more about it.
Optional/General comments	Strength in statistics but weak in writing skill. It will be good to have someone with good command in English to help polish up the article. Need wider readings with latest information to be able to provide more details relevant information and latest citations & references. Then, the introduction, the discussion and conclusion can make the journal more valuable for readers.	Thanks, the statistical analysis really takes a long time to do. The writing of the manuscript is revisited. The manuscript has cited 60 academic research and the authors are confident the study has undertaken a sufficient research both in depth and breath.
