PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The idea behind this paper is valid as it offers the possibility of knowing the reality of a particular country. The choice to use Karmarkar's Algorithm is also appreciable. The author/authors should deepen the part of the literature review related to the chosen theme, in particular by referring to the situation of other countries. The discussion of the results requires more explanation and arguments as well as the conclusions, in order to clarify how the model used can help banks maximize their profits.	Thanks for the comments. All the comments have been well noted and taken care of.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
