General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The authors should try to answer this questions: - Why is this a subject of interest for the readers? - What brings new compared to other related articles? - What is contribution of this paper to the economic field? At line 199 it is said “Emanuele Severino has recently argued” but the paper is from 2012, 8 years ago is not that recent. All the section 5 is from the same source (Severino, 2012) The authors should discuss the literature, not just present one book in a section. The conclusion should be more developed, eventually with own opinions, discussions regarding the subject	to my opinion, the paper is subject of interest for the readers and is new compared to other papers because it individuates a new mode of socialism, a new mode of p production. I have fully revised the paragraph 5, which now is no more only on Severino. I have abridged the quotation from line 24-35.
Minor REVISION comments		
Optional/General comments	It is difficult nowadays to write a qualitative theoretical paper, that's why I want to congratulate the authors for their work and courage and I hope my comments will help them improve this paper.
