PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In this paper, the results of a survey, applied to the sample of stakeholders, and the additional information support the recommendations about Nigeria needs to develop technology innovation and sustainable entrepreneurship.	
Minor REVISION comments	About the format: Tables and graphs have been numbered without correspondence with the section numbers. My recommendation is to number them consecutively, in two different groups (Figure 1, Figure 2, ... and Table 1, Table 2,... etc.). Line separation and margins (in Tables and References section) must be also check. Commas and points use also needs a review. Numbering of references is not necessary due to the citation style used. About information provided: A deeper explanation about Figure 3.2 would be useful.
