

**SDI Review Form 1.6**

|                          |                                                                                                  |
|--------------------------|--------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">Physical Science International Journal</a>                                           |
| Manuscript Number:       | Ms_PSIJ_42429                                                                                    |
| Title of the Manuscript: | OPTICAL TIME DOMAIN REFLECTOMETER ASSESSMENT OF ATTENUATION IN FIBER OPTICS COMMUNICATION SYSTEM |
| Type of the Article      |                                                                                                  |

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

|                                     | Reviewer's comment                                                                                                                                                                                                                                                                                                                                                                       | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Compulsory</b> REVISION comments | <p>1) There should be 1.0 before <b>introduction</b> as the author used numbering before materials &amp; methods, Results Conclusion etc.<br/>(1.0 introduction)</p> <p>2) Sometimes spacing is seen between number and unit and sometimes spacing is absent. It should be similar in everywhere.<br/>(1550 nm, 1597.35 m etc.)</p> <p>3) At least 10 more references are mandatory.</p> |                                                                                                                                                                               |
| <b>Minor</b> REVISION comments      | <p>1) Sometimes Capital letter is used unnecessarily.<br/>Example: line 44</p>                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                               |
| <b>Optional/General</b> comments    | This manuscript can be published after above mention corrections.                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                               |
