

**Editor's comment :**

Following two modifications are required for the approval and hence publication of the research paper

1. Omit/Delete "series 1" from Fig. 7b (CPT Test carried out in point 2) of the graph.
2. Rearrange the References in the text and consequently in the Reference List/Bibliography as per increasing numbers in numeric and not mention it in the text in alphabetical order in the Reference List/ Bibliography at the end of the paper. For example, reference [2] is mentioned firstly in the text which is at no.2 according to alphabetical order in the reference list . However, it should be placed at the no. 1 in the Reference List/Bibliography and [2] be replaced with [1] also in the text. ***Please note that if this journal requires mentioning/citing of references in order of alphabetical arrangement then do not consider this comment.***

**Author's feedback :**

My sincere appreciation goes to the reviewers who spared their precious time and energy to read through this work and also for their aids, constructive comments and criticism in realizing this work.
