PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Introduction is very briefly written. The authors are required more input in Introduction by citing recent available literature published in authentic fuel/chemical engineering journals. Please avoid long sentences throughout the manuscript. The CSO was used as blend. It should be added to the base oil in a definite ratio. Please provide a definite Oil to CSO ratios in Table-1. The authors have not discussed their results in a scholarly way. A detailed discussion will warrant publication of this manuscript. Further, the extracted oil should be analysed for chemical constituents like palmitic acid, steric acid, oleic acid, etc. Usually PSO and hindered phenols are present in plant extracts, which may act as oiliness improvers and as antioxidants respectively.	
Minor REVISION comments	NA	
Optional/General comments	English should be checked if correct gramtically	

PART 2:
