SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This is a conceptual paper. Therefore, it is expected that the author to demonstrate a vast and comprehensive reading regarding the title or area of interest of this paper. However, in most of the paragraphs, there are insufficiency of references or citation made. Many sweeping statements can be found in many paragraphs. These flaws have impacted the credibility of the writing itself.</p> <p>Usually in any conceptual paper, there must also an explanation on the methodology used in searching for related articles. For example, what database used to derive to articles, how were then the number of articles further filtered? What are the keywords used etc. Then the author also needs to explain how was the analysis of the articles done. For example, using a thematic analysis?</p> <p>The motivation behind the writing of the article also needs to be clearly presented. Why is it vital to look at the factors hindering to the use of technology among TVET teachers? How can the factors be different other discipline, for example, science and mathematics teachers?</p> <p>It is also crucial for the author to then explicitly write proposed measures to lessen the problems perhaps – and this needs to be related to the context of the study (Africa I believe).</p> <p>The overall idea is there, but the author may need to read up more conceptual papers from other journals to familiarize himself with the nature of conceptual paper writing.</p> <p>I wish you best of luck.</p>	<p>Keywords: Militating, Integration, Information and Communication Technology (ICT), Effectiveness, Technical and Vocational Education and Training (TVET)</p> <p>The motivation behind this study grew from the relevance and importance of technical and vocational education and training (TVET) programmes to the society. Undoubtedly, technical and vocational education and training (TVET) programmes involve practical skill acquisition and hands on experience, which has shown to be absent among present day graduates</p> <p>The epileptic nature of power in some African countries has led to damage of electronic equipment such as radio, television, video recorder and even ICT equipment such as computers. When electricity supply is not constant, it becomes difficult to keep high-tech equipment such as computers functioning, especially under extreme weather conditions as obtained in some African countries. The high level of dust during the dry season in some African countries also damages obsolete ICT equipment.</p>
Minor REVISION comments		Manuscript corrected in agreement with reviewers comment
Optional/General comments		Manuscript corrected in agreement with reviewers comment

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	Manuscript corrected in agreement with reviewers comment
